## INVITATION

On behalf of the organizing committee, it is our pleasure to invite you to participate in the second IBAAS (International Bauxite, Alumina & Aluminium Society) symposium (IBASS-CHALIECO-2013), **International Aluminum Industry Conference**, being held in Nanning, Guangxi, China from November 28 to 30, 2013 in cooperation with the CHALIECO & ANTAIKE.

The title of the IBAAS – 2013 symposium is **“Present Status and Future Prospects of Bauxite- Alumina- Aluminium Industry of the World, with Special Reference to China”**. The symposium organizing committee is formulating a world class program focusing on key topics and issues in the bauxite, alumina, primary aluminium and aluminum downstream industry of the world with special reference to China.

The aluminium industry structure is rapidly changing and production centers are shifting to developing, high growth potential countries of the world. Keeping in view and the increasing role of China in production of all types of bauxite, alumina & aluminium, second IBAAS event is being organized in that country. In the present depressed market, it is necessary to diversify production to value added products and in this connection technology and applications / uses of non-metallurgical Bauxite, Alumina and value added products of Aluminium will be given special attention in this conference. Taking all these facts into account, the Symposium has been planned with the following objectives:

- To review the promising research and development activities aimed at improving production and productivity in the existing bauxite mines, alumina refinery and aluminium plants.
- To highlight the proposed Greenfield activities of aluminium industry in the world with special reference to Asian countries.
- Latest technological developments in the field of bauxite beneficiation, alumina production, aluminium smelting, non-metallurgical bauxite and special alumina and aluminium products.
- Import and export potentials of bauxite, alumina and aluminium in China and other Asian countries
- Market and price trend of bauxite, alumina and aluminium and their products.
- Non-metallurgical applications of Bauxite and Alumina
- Market and price trends of calcined bauxite for refractory/abrasive industry, alumina cements, brown & white fused alumina, special alumina and all types of alumina chemicals.
- Latest technological developments in aluminum downstream industry.
- Market and price trends of Aluminium downstream products

The Symposium will provide an excellent opportunity to meet and interact with International experts, scientists, engineers, entrepreneurs, representatives of aluminium industries world over.

Authors, experts and industry professionals are invited to submit abstracts/papers for technical presentations in the Conference.

Best Regards

Organizers

## ABOUT IBAAS, CHALIECO & ANTAIKE

International Bauxite, Alumina & Aluminium Society (IBAAS) is set up and registered in India [Registration No. MAH-820/12 (N.)] by professionals active in various fields of aluminium industry. The initial activities are focused in the Asian region with special attention to India, China, Indonesia, Vietnam, Saudi Arabia and UAE. The founders of this society have vast experience in organizing similar conferences on bauxite, alumina and aluminium in India and China. IBAAS has successfully organized the first International event on '**Bauxite, Alumina and Aluminium Industry of Asia – Vision 2020**' in India during December 3-5, 2012.

China Aluminium International Engineering Corporation Ltd. (**CHALIECO**), a company listed in Hong Kong Stock Exchange and acting as R&D and engineering arm of Aluminium Corporation of China (CHINALCO), is one of the top 500 fortune companies of the world. CHALIECO is the leading technology provider and EPC contractor worldwide in the field of bauxite, alumina, aluminium and downstream providing services of project feasibility study, technical consultation, engineering, equipment and material procurement, project construction management, supervision and project management as well as equipment manufacturing.

Beijing Antaika Information Development Co., Ltd (ANTAIKE), the leading China Metal Information Provider is an authoritative, strategic, and in-depth analyst of the Chinese metals industries and markets. ANTAIKE is working under China Nonferrous Metals Industry Association (CNIA) and it has built up good relationship with thousands of Chinese miners, smelters, refineries, fabricators, metals consumers and traders, as well as Chinese government departments. At the same time, it has been working with a large number of international metals and mining corporations, associated organizations and research institutes. It has more than 10,000 clients, both in China and abroad. Antaika's metal events have been attracting more and more attendees in recent years. They have become the biggest and most informative gatherings in China and even the world, with their focus on specific metals such as copper, aluminum, lead and zinc, nickel and cobalt, gold and silver, indium, and others.

## **SESSIONS**

### **TOPICS OF IBAAS-2013 SYMPOSIUM**

#### **A. Bauxite and other ores of aluminium:**

- Geology, mining, beneficiation, processing, quality, marketing and price trends of metallurgical grade bauxite
- Alternate raw materials of alumina / aluminium production such as fly ash, Nepheline Syenite, Clay and other potential materials and their economics

#### **B. Alumina production:**

- Technical and economic analysis of Bayer process, improvement in equipment capability and efficiency with methods of cost reduction and better yields.
- Quality, market and price trend of metallurgical alumina

#### **C. Non-metallurgical bauxite and special alumina**

- Calcined bauxite for refractory, abrasive, brown fused alumina and other applications
- Bauxite based cements & chemicals
- Special alumina, alumina ceramic & chemicals
- Present market and prices of non-metallurgical grade bauxite-alumina products and future forecasts

#### **D. Production of primary aluminium and carbon materials**

- Modern trends in Smelter technology and improvement of aluminium reduction cell design for green-field construction and modernization of operating smelters.
- Carbon and refractory lining materials for aluminium smelting
- Primary aluminium quality and price trends

#### **E. Aluminium downstream**

- Melt purification, casting, rolling, alloying and fabrication
- Aluminum value added products
- Aluminum applications and developments in the field of construction, rail transportation, aviation, electronics, packing, etc.
- Marketing and price trends

#### **F. Environmental aspects of bauxite mining, alumina and aluminium production**

- Bauxite mining, beneficiation and processing
- Bauxite residue- Issues and prospects of disposal and utilization
- Carbon emissions and environmental aspects in Smelter operations
- Spent pot lining and gaseous emissions of aluminium industry.
- Safe disposal, recovery of valuables and use of waste/hazardous products of aluminium industry

**For young specialists and students, a special Poster Session will be organized to present poster papers at the venue of conference.**

## Important Dates

### DEADLINES FOR ABSTRACT AND FINAL MANUSCRIPT
