

# Assessment of Learner Needs

Dear Learner,

Please complete the three-part learner assessment survey. When you are done, please copy and paste the results and kindly email it back to [Reginaldo.Horwitz@va.gov](mailto:Reginaldo.Horwitz@va.gov) as a word document attachment. Don't over think your answers to the questions. The results could help you learn more effectively your specialty organization's certification exam and most importantly provide guidance as to how best to meet your learning needs during orientation and in your role as an adult professional lifelong learner.

To gain a better understanding of yourself as a learner, you need to evaluate the way you prefer to learn or process information. By doing so, you will be able to develop strategies which will enhance your learning potential. The following evaluation is a short, quick way of assessing your learning style. Its main benefit is to get you to think about yourself, to consider learning alternatives and not to rigidly classify or box you into a category.

## Part 1 Learning Style Assessment

(Please copy and paste the results starting here.)

Motivation styles vary for different situations and topics but nonetheless, you draw on them all the time, especially when you try to learn something challenging. If you can recognize your predominant motivational style you can identify the situations that best satisfy your needs. Likewise, you can't truly motivate anyone else if they are not motivated themselves. All you can do is invite them to learn.

Take a few minutes to complete the following questionnaire assessing your preferred motivation style. These questions have no right or wrong answers.

Please [click the link below to start](#). This should take less than 3 minutes. When you are done, please copy and paste the results and kindly email it back to me as a Word document attachment to [reggiedoc@yahoo.com](mailto:reggiedoc@yahoo.com), please.
