

# ANY ENCLOSURE from ENTRYDOORS-TORONTO

Many homes have been built with a roof or second floor sheltering the main entrance. These porch areas typically have one or more openings with either a square or curved top. Entrance enclosures are custom fabricated glass panels and doors made from 1 3/4" aluminum rail specifically designed to fit into these existing openings.

**If your home does not have an alcove, you can still have an enclosure!**

## WHAT CUSTOMERS SAY: Exceptional service from Alex at EntryDoors-Toronto

**Porch Enclosure.** Randomly picked Alex from EntryDoors-Toronto after being rejected by top companies mentioned at this (<http://homestars.com>) site (job was too small for them) To my surprised, I got very professional no-pressure advice, amazing choice of doors and quick and clean no-hassle installation from Alex's company. I am very pleased with the way this transaction went through and will definitely look for Alex for all other windows and doors needs in my house. Shimon P. in Richmond Hill
