

BIO•LUCENT white detox program

advanced white detox program home care series

with multi-targeting actives

diminish present pigmentation + purge trapped melanin + inhibit future melanin formation

active ingredients

• tranexamic acid • ethyl ascorbic acid • TR-4MSK • vitamin e acetate • vitamin a aldehyde • encapsulated salicylic acid
• palmitoyl pentapeptide-3 • acetyl hexapeptide-3 • deoxyarbutin • procysteine

1

day + night

white detox cream

incorporates innovative whitening ingredients to address melasma and skin pigmentation to brighten overall skin tone.

ethyl ascorbic acid

- a vitamin c derivative that inhibits the formation of melanin by restraining the Cu²⁺ activity of tyrosinase

TR4-MSK

- suppresses growth of melanin and prevents dark spots and freckles

m-tranexamic acid

- inhibits tyrosinase synthesis, preventing new pigmentation spots and freckles

palmitoyl pentapeptide-3 (Matrixyl™)

- stimulates the “matrix” layers in the skin - primarily collagen and fibronectin for enhanced collagen production
- encourages a reduction in the depth of wrinkles

acetyl hexapeptide-3 (argireline)

- a botox alternative that relaxes facial tension, providing a reduction in facial lines and wrinkles

vitamin e acetate

- a powerful antioxidant that deeply moisturizes and protects the skin

2

day + night (spot areas)

spot intensive target gel

incorporates innovative whitening ingredients in synergy with a Vitamin A derivative to diminish the intensity of melasma and skin pigmentation.

ethyl ascorbic acid

- a vitamin c derivative that inhibits the formation of melanin by restraining the Cu²⁺ activity of tyrosinase

vitamin a aldehyde (retinylaldehyde)

- accelerates epidermal cellular turnover
- act as a penetration enhancer to work in synergy with other actives

m-tranexamic acid

- inhibits tyrosinase synthesis, preventing new pigmentation spots and freckles

deoxyarbutin

- a highly effective, gentle and safe active compared to arbutin, kojic acid and hydroquinone

3

night (twice weekly)

white detox gel mask

a brightening mask formulated with AQUAXYL | LIPOMOIST | SENSONOV WR and a synergy of whitening actives that moisturizes dull, dehydrated skin while improving skin clarity.

procysteine

- a double functioning active (skin lightening and anti-aging)
- infiltrates into the skin quickly
- prevents tyrosinase activity and the formation of melanin

m-tranexamic acid

- inhibits tyrosinase synthesis, preventing new pigmentation spots and freckles

encapsulated salicylic acid

- a beta-hydroxy acid that gently exfoliates the skin, helping to clear out congested pores and improve the appearance of fine lines, wrinkles, blemishes and post-blemish scarring
