

BIOSTRATA  
innovative . natural . effective

LMA  
skin rejuvenation  
program

a gentle, effective professional salon  
resurfacing program to help reduce signs  
of aging, blemishes and dullness and  
restore skin clarity and radiance.

# LMA skin rejuvenation program

reduce, refine and enhance.

an exclusive formula of resurfacing fruit extracts, vitamins and antioxidants that work to gently refine and improve skin texture, correct enlarged pores, diminish the appearance of hyper-pigmentary conditions and reduce the signs of aging.

multi-targeting actives address the signs of aging, sun damage, uneven skin texture and dull, lack-lustre skin tone

reduce fine lines, wrinkles and uv sun damage + refine pore size and improve skin texture + enhance skin clarity and boost radiance

## the future is clearer...

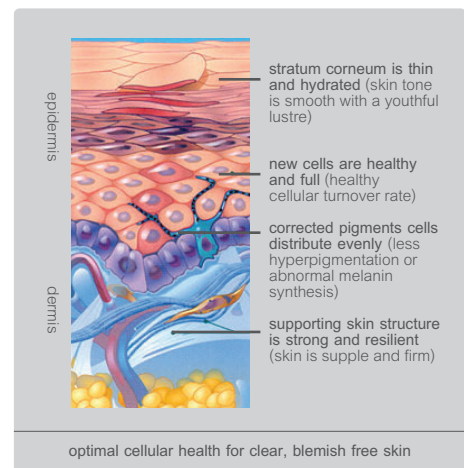

our specifically tailored high-performance active ingredients include:

- a gentle blend of fruit extracts including glycolic acid and mandelic acid • arginine • panthenol • niacinamide
- gluconolactone

these provide a comprehensive mechanism that encourage healthy cellular regeneration for optimal skin clarity and radiance and help to:

- refine pore size
- smoothen skin texture
- visibly diminish the appearance of fine lines and wrinkles
- improve skin clarity and firmness
- brighten and even the skin tone for an all-over healthy glow
- increase skin suppleness

a carefully selected formula with low irritation actives that make it suitable for all skin types, even sensitive skin.

1. alpha hydroxy acids encourage healthy collagen and elastin production

- help to break intercellular cement, stimulate collagen synthesis and activate cellular regeneration
- effective in addressing oily, blemish prone skin as well as aging, sun damaged skin types

2. arginine an amino acid derived from brown sugar with antioxidant properties

- encourages collagen production and increases elasticity
- offers low irritation, has a calming action with moisturizing and normalizing effects

3. panthenol Vitamin B5

- increases and regulates skin hydration, promoting a smoothing effect
- supports the regeneration of the skin and specifically, cell formation

4. niacinamide Vitamin B3

- reduces the appearance of skin pigmentation, wrinkles and red blotchiness
- an excellent skin lightening active that prevents melanin transfer
- leads to healthier cells and reduced visible signs of aging

5. polyhydroxy acids promote cellular rejuvenation and are suitable for use by sensitive skin types

- made up of larger molecules than traditional alpha hydroxy acids, polyhydroxy acids are typically gentler on the skin, causing less peeling, flaking and dryness
- as a free radical-fighting antioxidant, protects the skin from harmful UV exposure

before  
prior to starting  
sessions

after  
8 - 10 sessions with  
home care

blemish prone

pigmentation

fine lines

## a gentle, effective professional peel

our exclusive salon program objectives:

- a cost-effective, comprehensive and effective professional program, suitable for even sensitive skin types
- restores clear, youthful skin that has been affected by time, sun damage and oxidative environmental free radicals
- increases the skin's ability to absorb home care products more efficiently to maintain skin clarity
- 100% of users saw improvement in fine lines and wrinkles\*
- 95% of users saw more even skin tone, texture and radiance\*

\* results are the percentages of panel test respondents reported in the trials.

### number of sessions recommended

- 10 x weekly sessions (repeated every six to nine months)

### designed to offer ease of use, low irritation, no downtime and high efficacy

- session time: approximately 60 minutes

### program main steps

- double cleanse
- patch test
- protect sensitive areas
- peel application
- peel neutralization
- soothing mist
- soothing soft mask
- sunblock

program step	product	treatment time
make up removal	milk cleanser	3 minutes
cleanse	pro exfol prep wash	3 minutes
double cleanse	pro exfol cleansing wash	3 minutes
skin patch test	strata 2001 <sup>1</sup>	2 minutes
special care	recovery cream (point application) <sup>2</sup>	3 minutes
skin renewal	LMA skin rejuvenation ampoule <sup>3</sup>	3 - 12 minutes
neutralization	neutralizer foam	5 minutes
cleansing	rinse and cleanse with cold water	3 minutes
soothe	post mist (mix 1:1 with strata mist)	2 minutes
balance	recovery cream (a thick layer over face)	2 minutes
hydrating mask	phoresis mask extra	15 - 20 minutes
post cabin	post mist (mix 1:1 with strata mist)	2 minutes
	recovery cream*/spf 35+++**/spf 50+++**	

<sup>1</sup> if a positive skin reaction occurs (redness, irritation) it is advised that a more suitable treatment be given and not to proceed with the peel.  
<sup>2</sup> point application of recovery cream to areas such as the inner and outer corners of the eyes, folds of the nose, ears and mouth.  
<sup>3</sup> apply a thin, even layer and leave on for 3 - 12 minutes depending on severity of condition. always ensure full neutralization and removal.  
\* for some clients, slight redness and peeling similar to sunburn might occur. please continue to use recovery cream, strata mist or post mist to calm the skin for 3 - 4 days, followed by a suitable moisturizer.  
\*\* mandatory use of daily sun protection prior to sun exposure is recommended at all times after treatment.

# LMA skin rejuvenation program

## comprehensive home care rejuvenation system

### with multi-targeting actives

unclog and refine pores + promote cellular rejuvenation + inhibit and diminish melanin synthesis

#### active ingredients

- encapsulated glycolic acid • encapsulated salicylic acid • mandelic acid • lactic acid • retinyl palmitate
- hyaluronic acid

1

day + night

#### exfoliating serum I/II/III

a light-textured, oil-free serum that dissolves dull surface skin cells to reveal fresh new skin while gently moisturizing to help reduce dryness and irritation.

available in three strengths:

- exfoliating serum I (5%)
- exfoliating serum II (10%)
- exfoliating serum III (10% sensitive)

#### encapsulated glycolic acid (I/II/III)

- an alpha hydroxy acid that helps to break intercellular cement, stimulate collagen synthesis and activate cellular regeneration
- formulated with time-release technology to provide comprehensive care

#### encapsulated salicylic acid, mandelic acid, lactic acid (III)

- a blend of beta-hydroxy acid and mixed fruit acids that gently exfoliate the skin
- helps to clear out congested pores and improve the appearance of fine lines, wrinkles, blemishes and post-blemish scarring

#### hyaluronic acid

- boosts skin hydration and elasticity
- forms a protective barrier on the skin to help lock in moisture

2

day + night

#### rejuvenating cream/serum

aids in cellular regeneration and the prevention of collagen loss from photo-damage and aging.

#### retinyl palmitate (vitamin a palmitate)

- accelerates epidermal cellular turnover
- stimulates collagen and elastin production
- diminishes free radical skin damage
- gently exfoliates without dryness
- reduces the appearance of fine lines, wrinkles and blemishes

#### hyaluronic acid

- boosts skin hydration and elasticity
- forms a protective barrier on the skin to help lock in moisture

#### allantoin

- an anti-irritant botanical that aids in cellular regeneration

3

day + night

#### whitening cream/serum

addresses pigmentation issues while providing skin brightening benefits for improved skin clarity.

#### dermawhite + lumiskin

- functioning whitening actives to boost skin clarity
- prevents tyrosinase activity and the formation of melanin

#### alpha-arbutin + kojic palmitate

- inhibits tyrosinase synthesis
- protects from free radical damage

#### glycolic acid

- gently exfoliates and rejuvenates dull, lack-lustre skin

#### ferulic acid

- an antioxidant with sun-protective benefits

factors affecting skin aging and clarity:

- temperature and humidity (1)
- sun exposure and oxidative damage (2)
- sebum, sweat secretion and bacterial growth
- natural aging process and free radical attack (3)
