

4/0 Crossover Cables, Bulk Cable, Custom Length Rectifier Cables

Product Features

Many of our customers use a barrel design that requires an 18.5" crossover cable that occasionally needs changing due to corrosion buildup. This is a standard stock product offered by The Dangler Guys.

Besides offering any sized jumper a number of our customers have opted to run custom cables for rectifier power as opposed to the more expensive hard copper bussed system.

SPECIAL NOTE: Should you wish to install and terminate your own cable, TDG sells 4/0 welding cable in bulk 250' spools.

TDG can make any custom length jumper for your needs. Normally we install red or black shrink tubing on the terminal ends for easy identification on longer runs. Cables will be rolled up and tagged by length so they are ready for installation when you receive them.

CPP will also offer the cable

Product Features

- ♦ **Any length jumper w/copper terminal ends.**
- ♦ **Standard 18.5" crossover cables in stock.**
- ♦ **Custom made to length rectifier cables.**
- ♦ **Bulk cable on standard 250" spools.**
- ♦ **Take advantage of our volume wire costs.**
- ♦ **Very competitive pricing.**

Although most of the custom cables we have provided are of our standard 4/0 welding cable we have had past experience in providing 350 MCM and 500 MCM jumpers.

Please feel free to contact us for assistance in any of your cable needs.
