Greetings,

There is more exciting news from 1 Beyond.

This week, we'll be at the **BandPro OneWorld Open House 2012** event in Burbank, CA on December 13.

If you happen to be in the area, do stop by to see some of our latest developments including a preview of our new 1 Beyond line of Mac-based Thunderbolt systems for data wrangling and archiving.

Give us a call if you would like to learn more and read below for more details.

Best regards.

Terry Cullen, CEO and Founder

Previewing Mac-based 1 Beyond MacWrangler™ Systems

At the BandPro OneWorld event, 1 Beyond is demonstrating several new and innovative products that continue the long track record of innovation.

The 1 Beyond Wrangler line is now extended with the industry's first Mac-based all-in-one, portable, ruggedized, data wrangler systems for ingest, review and dailies. With a choice of four **1 Beyond MacWrangler™** systems that include Thunderbolt technology, one can rapidly off-load Sony F65 SRMemory, Sony F55/ARRI ALEXA SxS, RED EPIC, Phantom, P2 Camera memory or disks while shooting on-set or on-location. Capabilities include:

- Off-Load to disks and LTO-5 simultaneously
- Instant review or add metadata to video clips
- Preview high resolution full screen video results
- Optional dailies - editing in-field for "rough cuts",

:: (877) ONE-BEYOND
:: +1 (617) 591-2200

instant on-set playback, daily reviews connected to HD LCD or projector, final edits for immediate upload for broadcast

All use the familiar MacOSX operating systems and support the software Macs support! So those who favor this interface and operating system can take advantage of the rugged portable system building expertise for which 1 Beyond is well-known.

In addition, 1 Beyond now offers an archive solution for Mac laptops and or other systems with Thunderbolt, the **1 Beyond Wrangler LTO-5 ThunderTape™**.

This replaces the previously needed 4 external boxes (expansion chassis, disk drive, LTO-5 tape drive, camera memory reader), wires, power bricks and power strip.

Now, all that is needed is one Thunderbolt cable to the 1 Beyond ThunderTape, put in the REDMAG, and the rest is automatic using 1 Beyond MacWrangler software.

Visit the [1 Beyond website](#) to learn more.

1 Beyond SuperWrangler at OneWorld

In addition, the **1 Beyond SuperWrangler** will be demonstrated with **ASSIMILATE SCRATCH** software for color grading. Of note is that 1 Beyond has now partnered with Quantel as a reseller of **Pablo Rio** high-end color and finishing software and **Pablo PA** conform, preparation and workflow software. By adding this software to the field-proven Super Wrangler bag of tricks, 1 Beyond brings the first certified portable Pablo Rio and PA system to the market. 1 Beyond also supports also supports Blackmagic Design's **DaVinci Resolve**.

The 1 Beyond Super Wrangler is being shown with the **BigFoot Cart** option. It will make all variations of portability possible: roll around the studio with ease, take the portable cart for remote shoots, or grab the SuperWrangler off the cart to go completely portable. The Super Wrangler is a portable desktop for on-set or near-set with all of the capabilities you need regardless of the portability option you chose!

Visit RED at OneWorld

At the RED Camera stand, Jeroen Hendriks, of Pirates of the Caribbean 3D fame, will be demonstrating the **1 Beyond Wrangler RuggedRack** with four built-in

REDMAG readers that was used in Prometheus 3D.

1 Beyond Wrangler StreamMachine

Just introduced is the **1 Beyond Wrangler StreamMachine™**, a portable streaming TV Studio and DDR System for HD-SDI cameras. The industry's smallest and portable quad direct-to-disk recorder combines the Matrox VS4 quad HD-SDI card and Telestream Wirecast software with the compact rugged system from 1 Beyond. The results set a new bar for the Streaming Industry.

The StreamMachine was recently demonstrated in New York at Mitch Jacobson's MulticamP workshop on December 8-9 at AbelCine and by Telestream at Sports Video Groups' League Technology Summit on December 10-11.
