

1 Beyond™ LTOMac™-axle

Portable, Rugged Axle Media Asset Management

Creates MAM Database and LTO Archive of Video and Metadata with Auto-Proxy Generation

1 Beyond LTOMac™-axle system takes Axle, a radically simple Medial Asset Management application and combines it with a Database and LTO archive tape drive in a compact self-contained rugged portable system. It's a collaboration server with an internal 4TB database and an LTO-6 tape drive for data Archive. Running Axle software, it shows a web-browsable version of your folders and files to anyone you grant a username and password to. Each user can be set up to have a different "view" of your local file system, and these can be kept private from each other.

For the first time, the 1 Beyond LTOMac-axle allows cost effective, in the field, Cataloging of Video, Archive and Proxy Generation for immediate access to review, comment and approve from anywhere worldwide.

All access to the 1 Beyond LTOMac-axle is via standard web browsers; there is no client software to install on client computer systems or mobile devices, apart from an optional Java-based upload module that we provide to ensure reliable uploads of large files, even when network connections are less than perfect. Everything else – from iPad access, to modern browsers such as Chrome, IE9 and Safari – is via standard browsers, including the administrative interface. Assets can be stored on one or more Catalogs, which are top level asset stores (storage volumes or top level directories).

1 Beyond LTOMac-axle Features and Options:

- Totally Self-contained system including a high performance Mac system running OS-X, a 4TB Database disk and LTO-6 Tape Drive.
- A high powered 2.6GHz quad-core Intel i7 CPU provides high-throughput processing of a wide range of media files.
- Rugged Portable all-metal case with convenient handle.
- External ports: 1 Gigabit, Thunderbolt, 4 USB 3.0, 4 eSATA 6Gb, HDMI out, WiFi (with iPad interface), Blue Tooth, Audio In / Out and Firewire 800.
- Completely turnkey. Plug the system in, push start and it is ready to use.
- Custom Storm case for local travel, shipping and air travel.
- Self contained storage consists of a solid state system drive and a 4TB Database disk.
- Built-in LTO-6 drive for 2.5TBs of reliable, long-term archive data storage.
